W

ell-known German tuner Kelleners Sport is back, making an impressive comeback with their refined F10 BMW 535i premiering at the Essen Motor Show 2010.

The package includes an athletic aerodynamics kit consisting of a front apron extension with integrated LED daytime running lights, RS front spoiler lip, side mouldings, rear spoiler and rear apron extension with diffuser.

A stainless steel rear silencer with round dual tailpipes, which flank the diffuser at both the right and left sides, accompanies this to give the 535i a muscular and sporty look.

The increased engine power of the new Kelleners 535i underscores the car's aggressive look. A KS Power35 module boosts the car's engine power from 306 hp (225 kW) to 367 hp (270 kW) and raises its maximum torque from 400 to 480 Newton metres.

Thanks to its performance springs, the 535i now sits 30 millimetres lower, allowing it to achieve considerably improved driving dynamics.

Lightweight "Hamburg" alloy wheels developed by Kelleners Sport contributes to the car's improved performance too, specced at either 20 x 9JJ and 20 x 10JJ or 19 x 8.5JJ and 19 x 9.5JJ wheels on the front and rear axles respectively and paired with 255/35 and 285/30 tyres. These wheels are available in Matte Black, Polished Graphite Silver and Platinum Silver finishes.

In addition, Kelleners Sport has developed a stylish and innovative "Berlin" wheel design, where the five upper double spokes are a different colour from the five lower ones. Wheel surface is available in the same colours stated above for both the 19-inch and 20-inch versions.

Individual refinements in the interior create an exclusive ambience. These include the black velour foot mats featuring the Kelleners Sport logos as well as the aluminium pedals complete with footrests.

With the refined BMW 535i, Kelleners Sport is clearly leading the way into the future. With its impressive refinements, the BMW specialist will imbue all models from the Munich-based car manufacturer with sporty elegance.
